

N-Guard

Description :

The N-Guard is a personal voltage detector. It enables to alert the user of the proximity of a high voltage. Sound and light indication varies depending on the voltage level and proximity. The warning distance is about 2 meters for a voltage of 4kV AC.

An auxiliary input can be added in order to deport a visual indication (eg on a helmet).

Specifications :

- active watching (auto wake up.)
- Selftest integrated with good functioning or fault indication.
- Supply 3 AAA batteries.
- Low consumption.
- powerful sound.
- Double visual signaling by LEDs on the front panel.
- Low battery indication.
- "Silent mode" (the indication is only with light.)
- Can be used on 50Hz and 60Hz systems.
- Robust housing with impact protection ring.
- Fixing with belt clip or loop
